

# 3rd German Conference on Trilobites

8th and 9th October 2016, Museum für Naturkunde Berlin

## Information for the Exhibition

All collectors and participants are invited to bring beautiful, special or just exceptional specimens from their collection to present them at the exhibition.

### Technical Information:

- Lockable cabinets and showcases will be provided for the exhibition. Nevertheless the responsibility for the displayed specimens remains with the owner.
- Everyone who likes to participate to the exhibition, please fill out the corresponding column on the registration form. A phone number or e-mail for queries is needed !

*How to fill out the required space?*

*The necessary space can be evaluated by placing the designated specimens closely together on a table. Every fossil should be clearly visible. Please consider also some spacing for the labels. Measure the length and width of a rectangle area which encloses the fossils. These dimensions must be entered in the registration form.*

*Please make your own labels for the individual specimens. A useable size is for example 8 cm x 5 cm.*

*Content: fossil name, geological formation, locality, collection name.  
Mandatory are locality and collection name. For the rest use best judgement  
(Fossil name = "Nileus ?" is okay!)*

*Font: Type size should be large enough to be readable from a distance of 50 cm  
(handwriting, typewriter or printer).*

*If something special is needed for the display of the fossils, everyone has to bring it along (e.g. magnifier, a stand or a positioner with detailed pictures, etc.)*

- **Saturday 8th October 2016 at 9 o'clock** the buildup of the exhibition will start. Everyone is self in charge for the buildup and cutback of their displayed specimens. A coordinator assigns the corresponding display area in the designated cabinets, according to the declared space needed.
- Deadline for the registration for the exhibition is **02nd October 2016 at 24:00**.  
If the available space is already used up prior to the deadline, it will be announced on this website. At this point no further requests for space will be accepted.

*„Trilobites – Fascinating Marine Animals from the Palaeozoic“*
